Activity: Class Dog AnimalTester

```
1 // Delos Reyes, Aikon N.
2 // BSIT 1D
3 // Class Dog AnimalTester
4
5
6 package animalshop;
7
8 public class AnimalTester {
9
10     public static void main(String[] args) {
11         Dog dog1 = new Dog(name: "Ace", breed: "Beagle", weight: 45.6);
12         Dog dog2 = new Dog(name: "Bailey", breed: "Boerboel", noise: "arf-arf", weight: 80.2);
13
14         System.out.println("Dog name : " + dog1.getName());
15         System.out.println("Dog breed : " + dog1.getBreed());
16         System.out.println("Bark noise : ");
17         dog1.bark();
18         System.out.println("Dog weight: " + dog1.getWeight());
19
20         System.out.println("Dog name : " + dog2.getName());
21         System.out.println("Dog breed : " + dog2.getBreed());
22         System.out.println("Bark noise : ");
23         dog2.bark();
24         System.out.println("Dog weight: " + dog2.getWeight());
25
26     }
27 }
28
```

Output:

```
run:
Dog name : Ace
Dog breed : Beagle
Bark noise :
woof
Dog weight: 45.6
Dog name : Bailey
Dog breed : Boerboel
Bark noise :
arf-arf
Dog weight: 80.2
BUILD SUCCESSFUL (total time: 0 seconds)
```
